

Pyrometer senders, also known as thermocouples, are used for sensing high temperatures such as exhaust gas. They are an industry standard K Type signal and ungrounded for use in both marine and automotive applications. Manufactured from inconel for high temperature installations up to 1000°C continuous. Both have temperature resistant flying leads, with either straight or right angle termination.

Model	Description
	Standard straight
	Standard 90° angle

**Range** 0 - 800°C;  
**Thread** 1/4" NPTF;  
**Form** Ungrounded.
